Medicare E-Visits vs. Telehealth

<td>I think many are finding it confusing when saying &quot;e-visits&quot; and &quot;telehealth&quot; for Medicare patients because they are different. PTs are not recognized as telehealth providers - at least not right now.</td>
<td>Medicare makes a distinction between e-visits and telehealth. From <a href="https://www.cms.gov/files/document/general-telemedicine-toolkit.pdf">https://www.cms.gov/files/document/general-telemedicine-toolkit.pdf</a>: PTs, OTs, and SLPs are able to bill for e-visits, but assistants are not mentioned in the bulletin from CMS on March 17th “Clinicians who may not independently bill for evaluation and management visits (for example – physical therapists, occupational therapists, speech language pathologists, clinical psychologists) can also provide these e-visits and bill the following codes: [G2061, G2062, G2063]”</td>

<td>Where is the best place to get updates on Medicare and private insurance regarding tele-health? APTA, Medicare?</td>
<td>See Rick Gawenda’s comment: There is no need to give Medicare advanced notification that you are planning to provide e-visits to a patient. (Thank you, Rick!) You may let your patients know that e-visits are available, but they must request the service.</td>

</tr>
<tr>
<td>I think you need to clarify that telehealth and E-Visits are not the same. You can't use them interchangeably. This is Rick Gawenda. Telehealth is not covered and you can charge Medicare patients cash as of right now and an ABN is not required.</td>

## Providing and Documenting Medicare E-Visits

<table>
<thead>
<tr>
<th>Questions</th>
<th>Responses</th>
</tr>
</thead>
<tbody>
<tr>
<td>Should the documentation be done as a follow-up visit?</td>
<td>Since Medicare E-Visits are only for “established patients”, we are assuming that they would be appropriately done as a follow up visit, not an initial evaluation.</td>
</tr>
<tr>
<td>Could a therapist provide e-visit from the therapist’s home? Then does the current visit use the usual clinic as the place of service?</td>
<td>We don’t see any reason that an e-visit could not be done from the therapist’s home, but the place of service for e-visits is the clinic.</td>
</tr>
<tr>
<td>Are these G codes currently in InsightGo?</td>
<td>We are adding the e-visit “G-Codes”, billing rules, and CR modifiers to all client databases in the very near future. When those elements are added, therapists will be able to document procedures that could conceivably be completed remotely along with the appropriate e-visit code. At sign off, the system will automatically “roll” the normal CPT code into the appropriate e-visit code:</td>
</tr>
<tr>
<td>for e-visits( Medicare): states a patient portal is needed? sure we cant use zoom, skype or facetime? thought HIPPA was waived until &quot;disaster is over“ what is this patient portal? .. also talk about insightgo for pts in the home, how will this benefit a provider who is going into the home and when will it roll out..?</td>
<td>There is no problem utilizing a hybrid approach of some less frequent in clinic visits and e-visits.</td>
</tr>
<tr>
<td>If I have blended visits (some evisits/some in clinic) how will clinicient billing keep those separate?</td>
<td></td>
</tr>
<tr>
<td>with documentation for the 7 days , what if we talk to them more than once. We need to schedule them to document , should we only bill on the last visit for the week? , what about the 2nd week?</td>
<td></td>
</tr>
</tbody>
</table>
E-Visit Codes (G2061, G2062, G2063) are based on cumulative time over a 7-day period. If you are providing multiple e-visits within a 7-day period, you will need to track the cumulative time so you can apply the correct e-visit code for that 7-day period. Our general advice is to provide e-visits once weekly when appropriate to decrease the complexity of tracking cumulative time over multiple visits.

<td>Just to clarify- Is the 02 code built in yet to InsightGo?</td>
<td>The newest version of the system for supporting commercial telehealth requirements is currently in release. At this writing, we expect the release to be completed by Thursday, March 25th. The new codes and modifiers necessary for telehealth services are included in that release.</td>
</tr>
<tr>
<td>So what do we do at this point with our telehealth visits that we are already doing. So far we have not signed off on any of these notes waiting to make sure that we have those get coded correctly with the POS code etc</td>
<td>Complete your telehealth visit documentation that is in process or already completed, but do not sign off on those visits until the new version is in place, and the payer setup is completed.</td>
</tr>
<tr>
<td>I HAVE FOUND OUT WHEN CALLING ON THE COMMERCIAL SIDE, ASH(AMERICAN SPECIALTY HEALTH) THEY ARE TELLING US TO BILL OUR NORMAL CODES HOWEVER PLACE OF SERVICE 02, WE ARE CALLING ON OUR BLUE CROSS PLANS AND SOME COVER TELEHEALTH AND SOME DO NOT, HUMANA</td>
<td>You will need to check each commercial payer to learn about their telehealth policies and requirements.</td>

IS TELLING US TO BILL OUR REGULAR CODES HOWEVER PLACE OF SERVICE 02.

For the CPT and R codes that Clinicient plans on releasing this week. Will they be under the Procedures/Charge Ticket items?

DR and CR r to both be used for institutional claims.

Our state is required to cover telehealth, can I get clarity on what codes we would use for telehealth commercial visits. Is it just the normal 97110/97112 codes with correct modifier and place of service as "02", or is it 98970-98972?

<td>We talk only about Medicare and commercial insurances. What about public insurances like Illini Care or Meridian. Any changes with CPT codes for public insurances? Are we allowed to do e-visits?</td>

<td>Governor Newsom released memo on telehealth in state of CA stating all commercial payors must reimburse same amnt that was billed in clinic for their telehealth visit. Is there such a memo from Governor Cuomo in New York? this is what we will need so we dont have to check with each individual payor within the state.. thx</td>
<td>We think that is great news. But, even though the governor ordered all commercial payers to pay for telehealth, you will still need to know the exact documentation and claims requirements for each payer. We are asking all of our clients to send us information about any new state mandates, including New York.</td>

His friend didn’t have symptom &amp; waiting if test will be given. The patient didn’t have symptom as well. Should we close the clinic &amp; self-quarantine for 2 weeks &amp; do Telehealth?</td>
<td>We believe that you need to balance the benefit of hands-on in person care in your clinic or in the patient’s home with the risk of transmitting the virus to your patient, yourself, your family and your staff. In most instances, we believe it is appropriate to utilize some type of remote therapy approach utilizing available teleconferencing and Keet.</td>

<tr>
<td>Providing and Documenting Telehealth/E-Visits</td>
<td>Would you please address the fee schedule settings? When I checked on Friday CMS had not published allowed amounts for G0261 - G0263. The rates added to fee schedules seem to be the same across all clients.</td>
<td>Yes. We arbitrarily established a fee for these services because CMS had not established allowed payments for these services. We estimated the fee based on RVUs when available for any of the remote visit services. We did not try to calculate any geographical variability. When a fee schedule is established for these services, we will be able to update fee schedules accordingly.</td>
</tr>
<tr>
<td>I know that Clinicient has updated the Place of Service (POS) option to include Telehealth/E-Visit options. Does this automatically populate the GT and POS telecommunication billing codes?</td>
<td>No. There’s too much variability in the current guidelines for us to apply modifiers and POS automatically. They must be applied by the therapist manually.</td>
<td></td>
</tr>
<tr>
<td>In case this is not brought up, we did a trial billing for Medicare and it was denied with the GP CR modifier stating modifier is not consistent with billing codes and we used the G2063 code so we are going to take off the GP and try again.</td>
<td>You need to apply the appropriate E-Visit code (G2061, G2062, G2063) to trigger the billing rules which will roll time spent on procedures into the selected E-Visit code. If you’re still having issues, please submit a case to Support in the Empower Community: go.empowerconnect.com.</td>

<tr>
<td>Trying to figure out how to do these E-Visits and document multiple days within the 7-day period. Today I spoke to Sue for 10 minutes and she wants to have another on Friday. We don't know how to go about arriving today, doing a note and then doing one on Friday for the cumulative time for both dates. Won't today's visit cross over if it is signed off?</td>

<tr>
<td>Just to confirm, the POS set in the therapist’s notes trumps other places where POS can be set?</td>
<td>Yes.</td>
<td></td>
</tr>
<tr>
<td>I am interested in discussing the potential hold ups for CMS to allow for full Telehealth. I have heard that one hold up is the need for the physician involvement. Are we pushing the idea that this MD involvement could be waived and allow for us to move more into a primary care - direct access role?</td>
<td>Yes, we are advocating that rehab professionals be able to provide services without physician supervision.</td>
<td></td>

<tr>

<td></td>
</tr>
<tr>
<td>If an appointment is selected as Telehealth vs. home/clinic, will the Telehealth billing rule prevent standard CPT codes from being billed? I heard the POS 2 defaults to the 3 CMS codes?</td>
<td>No. Some standard CPT codes can be billed for a Telehealth visit for some commercial payers.</td>
<td></td>
</tr>
<tr>
<td>To confirm with E-Visits, a CR modifier is needed, but no 02 is needed. Is an 11 or 12 needed, if so where is that applied?</td>
<td>For CMS E-Visits, it is our understanding the POS is the physical location of the therapist. If the therapist is in clinic, then it would be POS 11, if the therapist is in the home, then it would be POS 12. The original information from CMS indicated that the CR modifier is to be used for E-Visits (G2061, G2062, G2063). However, we have received feedback from therapy organizations indicating that different MACS are providing other guidelines. Please check with your individual MAC.</td>

4) is not affirmatively excluded from practice in the State or any other State that is part of the 1135 emergency area. I just found this on the CMS website about ABN. This information is listed under Other Prohibitions Transfer liability to the beneficiary when Medicare would otherwise pay for items and services. This might apply to the new evals.

Have you heard that Medicare may send your average monthly payments to the provider? I heard from a dentist this is true, but not sure if it applies to PT.

Have you heard any more about Medicare and whether we can take new patients?

We honestly have not been able to confirm this but encourage to please proceed with the information Medicare has provided.

### Payment

| WE’VE BEEN TOLD TO COLLECT FROM PT AND THEN REFUND IF THEY PAY IN FULL. | This is dependent on the payer. If cost sharing has been waived, you are not obligated to attempt collecting co-pays and co-insurance. |
| Are clinics doing teletherapy collecting co-pays? | This is dependent on the payer. If cost sharing has been waived, you are not obligated to attempt collecting co-pays and co-insurance. |
| Is cost sharing occurring? Are co-pays being waived and are insurances paying fully? | This is dependent on the payer. If cost sharing has been waived, you are not obligated to attempt collecting co-pays and co-insurance. |
| Has anyone received payment on a Telehealth visit? | We encourage you to start a conversation in the discussion forum on the Empower Community: go.empowerconnect.com |
| What is Medicare paying regarding the codes for E-Visits? | It is our understanding, G2061 is approximately $12, G2062 is approximately $22, G2063 is approximately $34 depending on your location. |

### Support

| Where can clinicians find the modifier 95 to apply? | It needs to be applied by the therapist. Drop down grid to apply it. You can call support for additional help or submit a support case via the Empower Community: go.empowerconnect.com |

## Clinicient Town Hall FAQ – April 7

### April 7, 2020 | Rev 1.0

<table>
<thead>
<tr>
<th>Category</th>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Providing and Documenting Telehealth/E-visits</td>
<td>Have you created that statement about patient consent to Telehealth visits due to COVID-19 in the system that we can pull into note or do we need to create it?</td>
<td>Our recommendation is to save a “boilerplate” statement that can be saved and edited for each therapist. Here is a starting point: “The patient requested, and has consented to, this virtual visit in lieu of an in person visit to mitigate the risk of COVID-19 transmission. This visit was completed utilizing videoconferencing technology from my home office. The patient has previously consented to the use of this technology and the storage of video recordings. In addition, the patient understands that as providers we are not responsible in the event of a technology failure. Prior to the visit, the patient’s identity and location was verified. The clinical decision making that occurred as a result of the visit is included in the chart note.” Each therapist can revise the statement to personalize it for your needs, keep it in a document, then paste it into a summary statement for each remote visit.</td>
</tr>
<tr>
<td></td>
<td>How do you suggest we verify the patient ID upon eval if you’ve never meet them in person?</td>
<td>Attendees have suggested to ask the patient to hold up their driver's license and display it at the beginning of care.</td>
</tr>
<tr>
<td></td>
<td>This is the first I’ve heard of keeping a video recording. Is that something that must be done?</td>
<td>It is our understanding that a video recording is not required, but there may be some video conferencing vendors that archive the recordings and you may want to mention that to your patients.</td>
</tr>
<tr>
<td></td>
<td>Rick Gawenda says you cannot see a patient for a physical visit within 7 days of an E-visit.</td>
<td>Thanks for sharing. For the E-visit codes, you can only bill once for the total cumulative minutes in the 7-day period. We suggest for ease that you target only 1 E-visit per week per patient. Also, you cannot do an E-visit within 7 days of an in-office visit.</td>
</tr>
<tr>
<td></td>
<td>What POS code is used when 'home' is chosen?</td>
<td>12</td>
</tr>
<tr>
<td></td>
<td>For any new patient, first visit of evaluation and Plan of Care can be done by Telehealth/E-visit?</td>
<td>Not payable by traditional Medicare, but where Telehealth is allowed by commercial payers.</td>
</tr>
<tr>
<td></td>
<td>We have plans of care expiring for many folks who we are doing E-visits with. Should we attempt to re-certify these as able, even if we are not able to perform all</td>

<tr>
<td>Can you update us on the status of the multiple modifier issue?</td>

I am leaning towards Uber conference right now because it’s free until June 30, I believe, and relatively easy to use. We have also ran into the issue that the patient can’t use their phone for video even if the clinician is in the clinic.</td>
<td>We have embedded a link for Uber Conferencing directly within InsightGO for ease of use. Based on our evaluation we found that this is one of the more simple teleconferencing solutions. Uber Conferencing works best on laptop to laptop over chrome. We also recommend BetterPT as a more sophisticated HIPAA-compliant solution. Traditional Medicare was not paying for Telehealth codes for PT, OT, SLP and then they released an announced-on March 16th but did not update the interim rule for PT, OT, SLP as approved providers. We are simply guessing that the intent is to allow PT, OT, SLP but the interim rule still needs to be updated. There are some additional remote visit codes that were just recently suggested but we are still unclear. One of the attendees contacted their direct MAC who indicated that PT, OT, SLP could use the Telehealth codes.</td>

<tr>
<td>Will Cigna allow for PT, OT, and SLP to provide virtual care?</td>
<td>But, the open issue that has made this confusing is that CMS has not corrected that language making PT/OT/ST eligible providers for Telehealth services.</td>
<td></td>
</tr>
<tr>
<td>Yes. PT/OT/ST providers can now deliver virtual care for any service if it is on their current fee schedule and if CMS covers it virtually. We have removed the previous guidance that only a select number of codes on the fee schedule could be billed. PT/OT/ST providers should also submit virtual claims with a GQ, GT, or 95 modifier and a face-to-face place of service code (e.g., POS 11). Important notes: While we encourage PT/OT/ST providers to follow CMS guidance regarding the use of software programs for virtual care, we are not requiring the use of any specific software program at this time. We maintain all current medical necessity review criteria for virtual care at this time. Our national ancillary partner American Specialty Health (ASH) is applying the same virtual care guidance, so any provider participating through ASH and providing PT/OT services to Cigna customers is covered by the same guidance.</td>
