

Medicare Multiple Procedure Payment Reduction (MPPR)

IF YOU TREAT MEDICARE PATIENTS, MPPR COULD SIGNIFICANTLY REDUCE YOUR PAYMENTS. AVOID FINANCIAL SURPRISES WITH CLINICIENT.

As a way to curb costs, Medicare's Multiple Procedure Payment Reduction (MPPR) reduces payment for practice expenses to 50 percent for the second and subsequent therapy procedures furnished to the same day, even if they are in one or multiple disciplines (PT, OT, SP). Naturally this has a big impact on your Medicare reimbursement.

1ST UNIT	2ND UNIT	3RD UNIT
<ul style="list-style-type: none"> ▪ Full Payment for Practice Expense 	<ul style="list-style-type: none"> ▪ 50% Payment for Practice Expense 	<ul style="list-style-type: none"> ▪ 50% Payment for Practice Expense
<ul style="list-style-type: none"> ▪ Full payment for work 	<ul style="list-style-type: none"> ▪ Full payment for work 	<ul style="list-style-type: none"> ▪ Full payment for work
<ul style="list-style-type: none"> ▪ Full payment for malpractice 	<ul style="list-style-type: none"> ▪ Full payment for malpractice 	<ul style="list-style-type: none"> ▪ Full payment for malpractice

SIMPLE AND EFFICIENT

Eliminate complex MPPR calculations — the system does them for you.

VISIBILITY AND INSIGHT

Understand the impact of MPPR and what to expect to be paid.

PROVEN EXPERIENCE

Benefit from more than a decade of experience helping therapists manage Medicare.

Gain Actionable Insight into the Financial Impact of MPPR with Clinicient

MPPR has significant impact on your practice's financial health. To avoid being caught by a financial surprise, you need accurate insight into the impact of the MPPR on your cash flow and revenues. That's where Clinicient can help.

Clinicient provides the proven best practices, automated processes, coding rules and reporting tools all in one system to stay on top of MPPR and other Medicare programs like Manual Medical Review, enabling you to:

- Know what you should expect to get paid based on your fee schedule and MPPR
- Know when to apply the KX modifier and when a patient will reach the \$3,700 Manual Medical Review (MMR) threshold
- Adapt to decreasing Medicare payments from MPPR
- Get paid the maximum amount you're allowed

Medicare Multiple Procedure Payment Reduction (MPPR)

THE CLINICIENT DIFFERENCE

Since our founding more than 10 years ago, Clinicient has placed Medicare compliance at the forefront of everything we do. We provide proven best practices, end-to-end controls and visibility in a single, unified system to help effectively manage Medicare compliance, minimize your risks and get you paid what you're rightfully owed.

- Clinicient automatically calculates MPPR — you don't need to make complex calculations or refer to an external RVU calculator and use a Medicare fee calculator code by code
- Clinicient is a single system giving you end-to-end control and visibility
- Clinicient stays ahead of Medicare regulations and reimbursement policies and incorporates changes back into the system automatically so you don't have to worry
- Clinicient shares our insight and experience by providing free Medicare training and education with leading compliance authorities

CLINICIENT ADVANTAGE	BENEFIT
SINGLE SYSTEM	<ul style="list-style-type: none"> ▪ Provides end-to-end visibility into the impact of MPPR ▪ Offers end-to-end processes and controls to help manage MPPR and other Medicare requirements
AUTOMATIC MPPR CALCULATIONS	<ul style="list-style-type: none"> ▪ Calculates the expected payment from Medicare by visit or charge — no need to use a separate calculator to estimate the allowed Medicare payment ▪ Provides accurate estimate of expected reimbursements based on Medicare MPPR and Sequestration cuts ▪ No complex manual calculations
BUILT-IN RVU TABLE	<ul style="list-style-type: none"> ▪ Shows integrated RVU schedule and allowed reimbursements based on your clinic location ▪ Provides at-a-glance view of MPPR for specific CPT codes, localities and units
REVENUE REPORTING TOOLS	<ul style="list-style-type: none"> ▪ Shows discrepancies between expected and actual reimbursement so claims can be worked to get maximum payment ▪ Helps practice forecast the impact of MPPR on cash-flow and revenues ▪ Enables analysis of payer mix, payer profitability and reimbursement trends based on CPT codes and visit durations
THERAPY CAP AND MANUAL MEDICAL REVIEW MANAGEMENT	<ul style="list-style-type: none"> ▪ Provides therapy cap and MMR tracking, alerting and management based on MPPR calculations ▪ Helps avoid getting flagged for over/under use of KX modifier ▪ Helps avoid triggering MMR audits
